

Drone Fusion Research consent form

Drone Fusion is an international platform for drone researchers and schools innovating for a circular tomorrow. That means that we want to share and collaborate whenever possible so as to accelerate the drone revolution. Without data, no research can ever take place, hence with this research consent form you formerly agree to be potentially approached for purpose of voluntary participation in research activities (e.g answering online surveys or be asked to contribute to a focus group).

For details of the way the data will be managed please consult Saxion privacy statement at <https://www.saxion.edu/about-saxion/privacy-policy>
