

Terms & Conditions Drone Fusion platform

The “Terms & Conditions Drone Fusion” as outlined below provide information as to the purpose, general functioning of the platform, data management and user’s right and obligations . In this context the following terms are defined as follows:

Registered user (hereinafter referred to as “User(s)”) : Any individual representing themselves and/or an organisation who have successfully fulfilled the registration requirements in order to be given access to the platform.

Drone Fusion platform(hereinafter referred to as “Drone Fusion”): Web application run by Saxion University of Applied Sciences based in The Netherlands allowing users to come in contact with each other and upload documents/videos related to drones for the main purpose of education and research.

The use of Drone Fusion is subject to the following terms and conditions:

1.Scope of application and purpose

Drone Fusion is a web application which purpose is to accelerate the exchange/transfer of knowledge related to any drone activity worldwide. The goal of this initiative through this acceleration is ultimately facilitating education and research in order to contribute to the circular economy.

2.Operational purpose of the platform

Drone Fusion is a web application enabling users with an interest in drones to interact, share documents/videos and connect to each other for the main purpose of drone education and research. The platform is free to use. Access requires that the compulsory account registration requirements have been met. As Drone Fusion is a platform designed to bring people in contact with each other, the fundamental principle is that through having completed the registration, all users agree to be contacted by any other user in the course of a legitimate request for communication, collaboration or research purpose. A legitimate request is defined as “any attempt made by one user to another user for purpose of sharing, communicating or collecting data about drone-related subjects (including potential work collaboration)”.

3.Type of users

Access to Drone Fusion is open to anyone with an interest in drone-related subjects.

4.Account registration

Account registration is compulsory for accessing the platform. Formal acceptance of the terms and conditions, consent form and privacy statement needs to be completed for the account registration process to be finalised and gaining access to the platform.

5.Users interaction

Users, by agreeing with the research consent form, formerly consent to be potentially contacted by other users for purpose of sharing knowledge, collaborating or being asked to participate voluntarily into research activities. The spirit of such interaction is based on trust and goodwill of communicating around the subject of drones. Should any user be the subject of repeated and unwanted communication by any other user for reasons considered abusive by the other including commercial purposes of selling products/services (and/or any other reasons deemed in breach with the platform's intentions related to education and research as outlined in clause 1 and 2 of the "Terms & conditions Drone Fusion platform") he/she should report the offending user to the moderator (see under Moderation). Drone Fusion reserves the right to revoke access to Drone Fusion ,through the cancellation of their account, to any user failing to have followed the "Terms & conditions Drone Fusion platform". Repeated and unwanted communication is defined as " Any continuing communication using whatever means available on the platform from one user to another although the receiving user has indicated in writing (using whatever means available on the platform via the chat function and/or by email) that he/she has no interest in furthering any communication with that other sending user"

6.Users data

Drone Fusion collects data of users for the main purpose of creating a public profile which will help other users to identify opportunities for collaboration, communication or research. Data collected can be used for research and education purposes or for purpose of improving the services provided on Drone Fusion but will not in any way be used nor shared for the purpose of financial transactions with third parties. The data management of the data collected for account registration purposes falls under the general data privacy statement of Saxion University of Applied Sciences, details of how the user data is managed can be found at <https://www.saxion.edu/about-saxion/privacy-policy> . Users can update the data on their profile at anytime via the log in settings. Users can make use of the user data collected on Drone Fusion for research purposes on the basis that they have formerly registered under the Alliance of drones academic researchers and that they fulfil the requirements as per the research request form (user need to be employed by a bona fide university

/school/research institute, valid reason for the requested data, research details). To enquire about this possibility please contact Drone Fusion, see details below at the end of this document.

Examples when registration data may be used by Drone Fusion (including/but not limited to email address or selected profile tags):

- Sending Drone Fusion information relevant to the running of your account
- Responding to inquiries and/or other questions
- Sending emails related to education (e.g. call for joint curriculum development) or research (e.g. survey participation, call for papers)

7. User profile

User profile is critical to the functioning of Drone Fusion by allowing any other user to identify what users do and in what way they can share/collaborate together. Hence, many of the choices during registration are compulsory. The non compulsory choices are also important to give the total picture of what the user does or is interested in, we encourage users to fill in both compulsory and non compulsory requirements to have the highest level of details in the user's profile.

8. Liability

Users are solely responsible for the documents and videos they may upload on Drone Fusion and will do so on the basis that they either own the rights to the content and/or that the content is otherwise publicly available and/or free of such rights. No rights can be derived from Drone Fusion in case users abuse anyone's rights by uploading contents for which they have no rights.

Drone Fusion accepts no liability for the incompleteness or inaccuracy of the data from the user's profile nor for any data uploaded by users. Each user is responsible for uploading correct and accurate data.

9. Moderation

Although Drone Fusion cannot formerly check nor is intending to check the quality of the data uploaded, a moderator will evaluate the rightfulness of the content to be uploaded on Drone Fusion to prevent any gross misuse of the site (e.g uploading racist or sexually tinted material). This moderation process might delay the uploading of the content. We expect that this process will not take longer than one hour, should you experience any difficulties in uploading any content and/or would like to know why your content does not show after an

hour, please send a mail to t.j.m.tartarin@saxion.nl so that we can find a response to this situation. Should any user be found to upload inappropriate content on Drone Fusion, the user's account will be terminated with immediate effect without further investigation. We advise strongly not to share your log in details with anyone and keep these in a safe place to prevent possible malicious usage from third parties.

10. Termination of the account

Once registered any user can terminate its account to Drone Fusion and have all personal data present in the profile removed by simply sending a mail at t.j.m.tartarin@saxion.nl. A confirmation will be sent to confirm the termination of the account. Data such as documents/videos uploaded by any user during the course of their legitimate use of Drone Fusion, prior to their account revocation, will remain on Drone Fusion although their account has been terminated.

11. Revisions

These "Terms & Conditions Drone Fusion" have been issued on 1st March 2022.

Drone Fusion reserves the right to change the "Terms & Conditions Drone Fusion Platform" at any time to address possible changes which might affect the conditions under which users have registered and enjoy the use of Drone Fusion in accordance with the applicable laws. Should Drone Fusion makes such changes a communication will be sent to users to bring their attention to the changes and possible consequences for the running of their account.

Contacting Drone Fusion

Should you have any questions/feedback regarding the "Terms & Conditions Drone Fusion", the research consent form or Saxion privacy statement, we invite you to send us a mail at: t.j.m.tartarin@saxion.nl

Postal address: Saxion University of Applied Sciences, School of Finance & Accounting, Business Models research group, Drone Fusion (for the attention of Thierry Tartarin)
Handelskade 75, 7417 DH Deventer, The Netherlands

Telephone: 0031612479021

List of drone applications provided for registration is inspired by the list developed by Blyenburgh & Co from the report "The professional drone operations market" available at www.rps-info.com
